GENERAL INTRODUCTION

Sensor wells are designed to securely integrate temperature sensors into the system, protect them from physical damage, and enable precise temperature measurements without causing system downtime.

Key Feature:

To meet varying pressure, temperature, and corrosion requirements across different applications, they are produced using a one-piece, non-welded manufacturing process and are available in Stainless Steel and Brass.

TECHNICAL SPECIFICATIONS

GENERAL	
Model	EPL-SS / EPL-BW SERIES

Technic	
Well's head	Hex head (AF22)

PHYSICAL DIMENSIONS

DIMENSIONS AND WEIGHT	
Dimensions (High)	50 - 100 - 150 mm
Weight	350 g
Mounting Type	Vida

Dimensional drawing to be prepared. [DRAWING]
